*Abstract:* The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Shipbuilding and Ship Repair Facilities - Surface Coating applies to owners or operators of shipbuilding and ship repair facilities with primer and top -coat applications in manufacturing processes and in ship repair processes. Owners or operators of shipbuilding and ship repair facilities are required to report startup, initial performance test, and retest information. Facilities will also periodically report emission exceedances, changes to equipment, and comply with other requirements of the NESHAP. This information is being collected to assure compliance with 40 CFR Part 63, Subpart II.

*Form Numbers:* None.

*Respondents/affected entities:* Owners or operators of shipbuilding and ship repair surface coating facilities.

*Respondent's obligation to respond:* Mandatory (40 CFR Part 63, Subpart II).

*Estimated number of respondents:* 56 (total).

*Frequency of response:* Semiannual.

*Total estimated burden:* 28,700 hours (per year). 'Burden' is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$3,200,000 (per year), includes \$0 in annualized capital/start up and/or operation & maintenance costs.

*Changes in the Estimates:* There is no change in burden on the respondents from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: 1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and 2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs. There is a decrease in the reported hour burden due to a correction. The previous ICR incorrect included burden for federal facilities, which has been removed in this request.
